50-60Hz

IP  
44

**Description**

The MIRROR2 combines minimalist aesthetics with functional versatility. Made from high-quality aluminium and available in white, black or silver, it features a high-quality opal cover that ensures soft, uniform light distribution. Glare in the mirror image is effectively minimised and the entire wash area is bathed in natural light. The light can be adjusted to suit the surroundings using the adjustable colour temperature – from warm white to neutral white. The smooth surface makes cleaning easy, while the well-thought-out design ensures quick installation on walls and ceilings.
